

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

## PUBLICATIONS REVIEWED.

NORTH AMERICAN FAUNA NO. 21 consists of two papers prepared by Wilfred H. Osgood entitled "Natural History of the Queen Charlotte Islands, British Columbia," and "Natural History of the Cook Inlet Region, Alaska." These are based in the main on explorations made during the summer of 1900 by the author, with Edmund Heller as assistant, under the direction of the Biological Survey. Thirteen pages of the first paper are occupied by a list of the birds known to inhabit the Queen Charlotte Islands. These 96 species are variously annotated, but chiefly in a technical vein. Two insular forms are described as new, *Dryobates picoides*, related to the Harris Woodpecker, and *Cyanocitta stelleri carlotta*, resembling the Steller Jay. A dark northwest-coast form of the Saw-whet Owl is also distinguished as *Nyctala acadica scotae*. The author has resuscitated an ancient synonym of Gmelin's *Picus ruber* for the northwest coast race of the Red-breasted Sapsucker, calling it *Sphyrapicus ruber flaviventris* (Vieillot). The reasons for so doing are not clearly explained but the implication is, apparently, that Gmelin's *ruber* should be restricted to the form occupying the arid Boreal Zone of the interior and southern California. Without discussing the matter at length, it has seemed to us that this is a most unwarranted procedure. Although the habitat of *Picus ruber* is (erroneously?) stated to be "Cayenne," it was probably based on Captain Cook's description, the same as *Picus flaviventris*. Either *ruber* should be rejected altogether, or it should apply, as heretofore understood, to the northwest-coast form.

In the second paper, ten pages are devoted to a list of the birds of the Cook Inlet Region. Of the seventy-seven species enumerated, the known ranges of several are notably extended. The Dusky Horned Owl, Rufous Hummer and Rocky Mountain Creeper probably find their westernmost stations in this region. The unexpected discovery of the White-tailed Ptarmigan so far northwest is also an evidence of energetic field-work, in a country where the collector does not always meet with "one continual round of pleasure!"—J. GRINNELL.

BULLETIN NO. 15 OF THE U. S. DEPARTMENT OF AGRICULTURE. DIVISION OF BIOLOGICAL SURVEY, prepared by Dr. Sylvester D. Judd, treats of "The Relation of Sparrows to Agriculture." Aside from its bearing along econ-

omic lines, this paper obviously adds much to our knowledge of the general habits and ecology of sparrows. The account of observations made in the field is very entertaining, and evinces an unusually acute perception on the part of the observer. The experiments carried on with caged birds are also quite suggestive. It was found that so-called "protectively colored" insects, even though presented to a song sparrow, partly covered by earth of the same hues, were discovered and eaten by the bird with remarkable promptness; and that some "warningly colored" insects, provided with odors and taste very disgusting to a person were as greedily devoured; but others, after the first taste, were subsequently avoided. The birds showed an extremely acute power of discrimination, for they carefully avoided stinging insects; though stingless species of similar appearance, and which are usually cited as examples of "protective mimicry," were at once devoured. This is rather discouraging testimony for the theorists. Yet there are many enemies of insects besides birds, and these may be oftener baffled by the color artifices than are the keen-sighted sparrows.

The conclusions reached in regard to the economic value of sparrows, is very favorable. In fact they are said to be the most beneficial of any groups of birds so far studied. This statement does not however include the English sparrow, which is declared to be unqualifiedly obnoxious wherever it occurs.—J. G.

DIGEST OF GAME LAWS FOR 1901. By T. S. Palmer and H. W. Olds.—It is stated that "the object of this report is to present in convenient form the provisions of the laws now in force, including the amendments enacted during the present year." Some 200 changes in the game laws of the various states has necessitated a complete revision of former bulletins, so that the present Bulletin brings the game laws of each state and territory into convenient form. Every detail has been gone into with great system and tables covering almost every phase of the open and close seasons of each species of game have been prepared, with the result that the public has at its command a compendium of the game laws such as could result from scarcely any other source than a government bureau with its thorough and systematic work. The bulletin is quite as much of a necessity to ornithologists interested in bird protection as to sportsmen.—C. B.

BIRDS OF MADISON COUNTY, N. Y. By George C. Embury (Bulletin of the Dept. of Geology and Natural History, Colgate University). Hamilton, N. Y., 1901.

This is one of the neatest local lists it has been our pleasure to receive, being, as its title indicates, a list of the birds of Madison County, Central New York. 192 species and a hypothetical list of 16 species are recorded, with

brief notes concerning abundance, date of arrival and nesting data. An excellent half tone of a bluebird at its nesting hole adorns the list as frontispiece. Aside from the scientific merit of the list, it may well be used as an ideal by those workers who appreciate system, typographical neatness and exactness.—C. B.

PROCEEDINGS OF THE NEBRASKA ORNITHOLOGISTS' UNION. This is a compact volume of 100 pages with ten excellent illustrations, setting forth the proceedings of the second annual meeting of the Union at Omaha on Jan. 12, 1901. The minutes, constitution of the Union and a list of members is followed by 21 papers on various scientific subjects relating to birds, by 17 authors. Many of the papers are valuable contributions to the science of ornithology, two notable titles being "Internal Parasites of Nebraska Birds" by Prof. Henry B. Ward and "Migration Records and Nebraska Records" by Robt. H. Wolcott. The present notice renders it impossible to consider any of the articles in detail, but the report is one which every active ornithologist will wish to own.

The present roster of membership shows 4 honorary, 63 active and 36 associate members. The officers of the Union for the present year are I. S. Trostler, president; Caroline Stringer, vice-president; E. H. Barbour, recording secretary; R. H. Wolcott, corresponding secretary. It may be remarked that the present Proceedings are a substantial improvement over the first annual report, thus indicating a healthy growth of this energetic state club. The Nebraska Ornithologists' Union has happily solved the question of publishing its own official organ, and instead of attempting a monthly or quarterly journal, which a moderate membership renders incapable of support, it combines its transactions in a single annual report, substantial in text and lasting in value.—C. B.

### Official Minutes Southern Division.

SEPTEMBER.

The regular meeting of the Division was held Sept. 30 at the residence of Roth Reynolds in Los Angeles, President Daggett presiding. Nine members were present. The final draft of the new constitution as recommended by the Northern Division was read and discussed, and after minor changes the same was adopted. Messrs. Alphonse and Antonin Jay were elected to active membership. A committee of three, Messrs. Swarth, Leland and Robertson, was appointed to make all arrangements necessary for the outing meeting to be held during the latter part of October. The following papers were read: Nesting of the Prairie Falcon by O. W. Howard; A Further Plea for the Collection and Use of

Facts by Roth Reynolds and An Answer and Criticism of the latter paper by H. S. Swarth. An interesting discussion followed after which the meeting adjourned.

HOWARD ROBERTSON, Division Secretary.

### Official Minutes of Northern Division.

The regular bi-monthly meeting was held Nov. 2, 1901 at the residence of C. W. Randall, Piedmont, Cal. President Grinnell presided with seventeen members and six visitors present. The new constitution was given its final reading and was adopted to take immediate effect. The following persons were proposed for active membership: Dr. David Starr Jordan, Stanford; Dr. Chas. H. Gilbert, Palo Alto; Miss Sophie Englehardt, Oakland; Mrs. F. E. Dorsey, Stanford; S. A. Barrett, F. W. Bancroft and Luther J. Goldman of Berkeley.

At Mr. Emerson's suggestion a Committee of Five was appointed to formulate arrangements for the tenth anniversary of the Club's inauguration in 1903. The following were named as committeemen: W. Otto Emerson, Chairman; J. O. Snyder, J. Eugene Law, Frank S. Daggett and C. Barlow. Nominations for officers for 1902 resulted as follows: For president, Joseph Grinnell; for senior vice-president, R. S. Wheeler, D. A. Cohen, Chas. R. Keyes and H. W. Carriger; for junior vice-president, E. H. Skinner and W. K. Fisher; for secretary, C. Barlow; for treasurer-business manager, C. Barlow.

The following programme was rendered: Address by Wm. L. Finley on The Bird Rocks of the Oregon Coast. Mr. Finley exhibited a large series of especially excellent photographs, the work of Herman T. Bohlman of Portland, who accompanied him on the trip. John M. Willard spoke on Lassen County Birds and a paper by O. W. Howard was read entitled Experiences with the Prairie Falcon. Adjourned to meet at Santa Clara Jan 11, 1902.

C. BARLOW,  
Division Secretary.

### NOTICE TO NORTHERN DIVISION MEMBERS.

The Annual Meeting of the Division instead of occurring on the usual first Saturday evening in January, has been set for the second Saturday, January 11, 1902. The meeting will be held at Santa Clara, and a programme of unusual interest is being arranged. Detailed reports of the business office of the Club will be presented and a banquet will be held after the meeting. Every member within reach is urged to be present if possible.
